[📍 Ciudad Obregón, Sonora, México](#) | Open to Remote Work

PROFESSIONAL SUMMARY

Senior Java FullStack Developer with over 11 years of experience in high-complexity enterprise software development. Specialized in Microservices Architecture using Java 17 / Spring Boot 3.x on the backend and Angular (up to v18) on the frontend, with extensive experience in the banking sector (Santander, Bancoppel, MONEX) and retail industry (Coppel, Telcel).

Proven track record in software architecture design, Hexagonal Architecture implementation, Spring Batch processes, CI/CD pipelines, and cloud deployments on OpenShift, Kubernetes, Google Cloud, and AWS. Solid background in application security: OWASP Top 10, SAST/DAST, SonarQube, and Fortify.

Technical leadership of backend teams: code reviews, architectural standards definition, mentoring, and code auditing.

TECHNICAL SKILLS

Backend Java 8 / 11 / 17 · Spring Boot 2.x / 3.x · Spring Cloud · Spring Batch · Spring Security · Java EE · JSF · Microservices · REST API · SOAP · Maven · JPA / Hibernate · Hexagonal Architecture · Kafka

Frontend Angular 2 → 18 · TypeScript · JavaScript · HTML5 · CSS3 · SASS / LESS · Angular CLI · Node.js · Bootstrap · RxJS

Cloud & DevOps Docker · Kubernetes · OpenShift · Jenkins · GitHub Actions · Azure DevOps · CI/CD · AWS (EC2, SQS) · Azure · Google Cloud · Linux · SSH · Grafana

Databases Oracle · PostgreSQL · MySQL · SQL Server · Informix

Quality & Sec. SonarQube · Fortify · OWASP Top 10 · SAST · DAST · JUnit · Mockito · Unit Testing · Functional Testing · Code Review

Tools IntelliJ IDEA · Eclipse · Git · GitFlow · GitHub · Postman · JIRA · Swagger / OpenAPI · Draw.io · GitHub Copilot

Methodologies Scrum · Agile · DevOps · Waterfall · GitFlow · Microservices Architecture · Hexagonal Architecture · Software Architecture Design

WORK EXPERIENCE

Neoris de México

Sr. Java FullStack Developer + Angular

Santander México S.A. — Business Charges Integration (BET System) | Dec 2025 – Mar 2026 | Remote | Team: 5 people

Stack: Java 8 · Java EE · JSF · SOAP · REST · Oracle · IBM WebSphere · SonarQube · Jenkins · Git

Integration of a new schedule-based corporate charge assignment process with mass file processing capability into an existing online banking legacy system.

- Analyzed waterfall documentation and use cases for integration into the BET system
- Developed backend and frontend (JSF) features based on defined use cases
- Performed functional tests, integration tests, and vulnerability scanning with SonarQube
- Configured IBM WebSphere server and adjusted application parameters to target environments
- Documented functional tests and tracked deployment management across environments

Sr. Java FullStack Developer + Angular

Santander México S.A. — Guarantee Reconciliation System (Greenfield) | Jul 2025 – Nov 2025 | Remote | Team: 3 people

Stack: Java 17 · Spring Boot 3.x · Spring Cloud · Spring Batch · Angular 18 · Oracle · OpenShift · Docker · Kubernetes · GitHub Actions · SonarQube · Fortify · Grafana · Kafka · Azure Entra ID

Full greenfield design and development of a banking guarantee reconciliation system across multiple bank departments, with daily mass file processing loaded from a web portal. Primary architectural responsibility in a 3-person team.

- Designed Microservices backend architecture with Hexagonal Architecture (Java 17 / Spring Boot 3.x)
- Built Spring Batch processes for daily mass file processing and post-processing
- Integrated Azure Entra ID authentication module into Angular 18 frontend portal
- Migrated microservices to Hexagonal Architecture and generated Docker/Kubernetes configs on OpenShift
- Reduced security vulnerabilities to 0 critical issues using SonarQube and Fortify (SAST/DAST)
- Performed microservice debugging and monitoring on OpenShift using Grafana
- Deployed Batch services on Linux servers via Jenkins over SSH
- Modeled data schema and generated initial load scripts for Oracle DBMS
- Produced technical documentation, architecture standards, and development guidelines

Sr. Java FullStack Developer + Angular

Coppel — Legal & Administrative System Re-engineering v3 | Jan 2024 – Jul 2025 | Remote | Team: 35 people

Stack: Java 17 · Spring Boot 3.x · Spring Cloud · Angular 15 · PostgreSQL · Docker · Kubernetes · Google Cloud · Azure DevOps · SonarQube · Grafana · JIRA

Built a new version (v3) of Coppel's legal and administrative system, migrating and improving features from the previous system within a large-scale Scrum team.

- Developed Java 17 / Spring Boot 3.x microservices following Coppel's microservices architecture standards
- Implemented frontend features in Angular 15 using TypeScript, SASS, and Bootstrap
- Created and maintained Docker/Kubernetes configurations for deployments on Google Cloud (GKE)
- Mitigated vulnerabilities with SonarQube and maintained unit test coverage with JUnit/Mockito
- Designed and modified PostgreSQL tables with initial data load scripts
- Executed CI/CD deployments via Azure Pipelines across test and production environments
- Managed versioning under Coppel standards using Git and GitFlow on Azure Repos

Sr. Java FullStack Developer + Angular

Telcel — Device Warranty Management System Re-engineering | May 2023 – Jan 2024 | Remote | Team: 8 people

Stack: Java 17 · Spring Boot 2.x · Spring Cloud · Angular 13-15 · PostgreSQL · IBM WebSphere Liberty · SonarQube · Grafana · Azure DevOps · JIRA

New version of Telcel's device warranty management system. Held backend team technical leadership responsibility.

- Led backend team of 4 developers: code reviews, pair programming, architectural standards definition, and technical mentoring
- Defined and modeled software architecture, application profiling, and IBM WebSphere Liberty server configuration
- Developed and migrated Java 17 / Spring Boot 2.x microservices with Telcel data modeling standards
- Implemented frontend features in Angular 13-15 with TypeScript and Bootstrap
- Conducted backend code audits and vulnerability mitigation with SonarQube
- Configured tools and repositories; tracked feature deliveries and deployments

Sr. .NET FullStack Developer + Angular

CEMEX — Multinational Operations System | Feb 2023 – May 2023 | Remote | Team: ~10 people

Stack: .NET · C# · .NET Framework 4 · Angular 11 · SQL Server · Git · SonarQube · JIRA

- Developed new backend (.NET/C#) and frontend (Angular 11) features under Scrum methodology
- Migrated obsolete features and mitigated vulnerabilities with SonarQube

UST Global

Sr. Java FullStack Developer + Angular

Coppel — Legal & Administrative System Re-engineering v2 | Mar 2022 – Dec 2022 | Remote | Team: +35 people

Stack: Java 11 · Spring Boot 2.x · Spring Cloud · Angular 11 · PostgreSQL · Docker · Kubernetes · Google Cloud · Azure DevOps · SonarQube · Grafana · Rancher

Built version v2 of Coppel's legal and administrative system. Monolithic-to-Microservices architecture migration.

- Developed Java 11 / Spring Boot 2.x microservices and Angular 11 features in Scrum sprints
- Executed monolithic-to-microservices migration deployed on Google Cloud (GKE)
- Generated Docker/Kubernetes configurations and supported deployments in test and production
- Contributed to CI/CD via Azure DevOps Pipelines for continuous feature delivery
- Performed SonarQube vulnerability mitigation and pair testing / pair revisions with the team

TCPIP

Sr. NodeJS FullStack Developer + Angular

Estudia Más — Student Credit Management System | Oct 2019 – Feb 2022 | On-site / Remote | Team: 4 people

Stack: Node.js · NestJS · LoopBack 3 · AngularJS / Angular 9 / 10 · MySQL · AWS (EC2, SQS) · JIRA

- Developed backend features (Node.js / NestJS / LoopBack3) and frontend features (Angular 9/10)
- Designed v2 frontend architecture: project structuring, generic modules, and reusable integration configurations
- Managed deployments on AWS EC2 with environment configuration and CI/CD pipelines

Sr. Java FullStack Developer + Angular

MONEX Banking API — Administrative Portal | Jan 2019 – Oct 2019 | On-site | Team: 6 people

Stack: Java 11 · Spring Boot · Angular 8/9 · MySQL · AWS (EC2, SQS) · WSO2 · Maven

Administrative portal for monitoring, testing, and subscribing to the MONEX banking API, integrated with the MONEX transaction execution service and technical documentation site.

- Designed initial backend and frontend project architecture from scratch
- Developed integration features with the MONEX transaction execution service
- Configured WSO2 for multi-tenant environments
- Generated technical documentation site and integration SDK for external developers

EARLY EXPERIENCE (2016 – 2018)

Solser Information Technology | Sr. Java Developer

Bancoppel — Banking System Re-engineering v2 (Oct 2017 – Dec 2018) | On-site | Team: 20 people

Stack: Java 8 · Spring Framework · PostgreSQL · IBM WebSphere · SOAP/REST

Mentored a team of 20 developers. Analyzed, migrated, and developed Bancoppel's banking system from a legacy VisualBasic codebase.

Novutek SC | Java FullStack Developer

ITSON — Human Resources ERP System (Jan 2017 – Oct 2017) | On-site | Team: 30 people

Stack: Java 8 · Spring Boot · Angular 2-4 · PostgreSQL · MySQL

ERP system for HR management: organizational hierarchies, salaries, payroll, reporting, and workforce projections.

Emcor Software / Repobox | .NET Developer

Feb 2016 – Jan 2017 | On-site

Stack: .NET · C# · SQL Server · Windows Forms · TFS

Development and support of administrative ERP and electronic invoicing systems.

EDUCATION

Instituto Tecnológico de Sonora (ITSON)

B.S. in Software Engineering | Ciudad Obregón, Sonora, México | Graduation Year: 2015

CERTIFICATIONS & TRAINING

Application Security (NEORIS)

OWASP Top 10 (2021) · Secure Coding Practices · PCI-DSS 4.0.1 · SAST/DAST — Dynamic Analysis · GDPR · ISMS V1.0 · Secure Development Process SSDLC · Personal Data Privacy

Backend & Architecture (Udemy)

Spring Batch & Spring Boot · Spring Boot: Complete Guide from Development to Deployment · RESTful API Development with Spring Boot + JPA + Cloud · Object-Oriented Programming with Java — MVC & Spring MVC · Apache Maven Pro

Frontend (Udemy)

Angular Components – PRO Level (Angular 2/4/5/6/7+) · Angular 2+ with TypeScript - Essential Training · TypeScript for Angular · HTML / CSS From Scratch
